Describe how you promoted the 2026 IDEP (maximum 150 words)	In my school, unfortunately we did not promote IDEP at all.
Explain the significance of promoting the 2026 IDEP for your target audience (maximum 150 words)	Promoting the 2026 IDEP may particularly be important for our target audience, as it highlights education as a key element of social rehabilitation and inclusion and successful reintegration. Many people in prison have experienced educational disadvantage, exclusion or limited access to learning opportunities. IDEP provides an opportunity to show them that education can be a realistic pathway towards personal development, improved skills, greater self-confidence and better prospects after release. For educators, prison staff and organizations working with socially excluded adults, IDEP also creates a space to exchange good practices, raise awareness of the specific educational needs of people in prison and strengthen cooperation between institutions.
Explain why you consider your 2026 IDEP activity to have been a success (maximum 150 words)	We consider this activity to be successful because it actively engages both learners and educators and creates a meaningful space to discuss the role of education in personal development and reintegration. Participants get involved in the activity and reflect on how learning can support positive change during imprisonment and after release. The activity also helps raise awareness of prison education and strengthens the sense that education is an important part of social inclusion and lifelong learning. Feedback from participants is positive and the event encourages discussion, cooperation and further interest in educational opportunities.
